Lead Free Legislation

Dear Valued Customers,

PRIER has been keenly aware of the lead free legislation and has been closely monitoring this bill with the EPA, ASA Lobby Partners and our certifying laboratories. PRIER has lead free for products that fall under the jurisdiction of the Senate Bill 3874-Reducing Lead in Safe Drinking Water Act, namely the PRIER 20 series stop valves and the 22 series stop and waste valves.

From the letter of the law and its interpretation by said testing bodies, PRIER's "hose threaded" products are exempt. Senate Bill 3874 (Reducing Lead in Safe Drinking Water Act), effective January 4, 2014 amends the current legislation to require all plumbing valves to meet a new standard of no more than .25% of wetted surfaces can contain leaded brass. This bill also states the following exemptions clause: "The prohibitions in paragraphs 1 & 3 shall not apply to- "pipes, pipe fittings, plumbing fittings or fixtures, including backflow preventers, that are used exclusively for non-potable services such as manufacturing, industrial processing, irrigation, outdoor watering, or any other uses where the water is not anticipated to be used for human consumption."

In this regard, the majority of PRIER's products meet the "exempt" status because they are for non-potable irrigation use. PRIER's exempt parts will be labeled accordingly. In reviewing this law with the other "hose threaded valve" manufacturers, we are in like status.

Best Regards,
Scott Livingston, National Sales Manager

Beige 400 Diamond Series Residential Hydrant

478-08-B
Diamond Series

This **400 Diamond Series** was re-engineered in 2013 with a new stem for greater reliability and a 3 year warranty. This valve has a large easy to grip handle that is now **available in beige** or dark grey. The "smart-turn" design allows the valve to be open or closed with 180 degree rotation, for easy operation and flow control. **This valve is also available in lead free on page 3.*

COMMERCIAL DESIGNS

by PRIER

PRIER commercial hydrants are superior to the competition in their ease of installation and use. They are designed for reliability and that means we consult with contractors, engineers and plumbers so that our valves save time, money and headaches down the road. When every detail counts, choose PRIER.
