P-260 Freezeless Ground Hydrant

Application

close-up view

- **Freezeless**
- **Self Draining**
- **Variable Flow**
- **Lockable**
- **ASSE 1052 Backflow Preventor**
- **Triple Seal Stopper**
- **Patent Pending**

Prier's P-260 ground hydrant provides a year around source of water to areas subject to freezing temperatures. The P-260 is unique to the industry in that it allows air in the stem cap for self-draining with the ASSE 1052 vacuum breaker. This patent pending brass stem cap design also allows the stem to be removed and a stopper replaced without removing the cast iron head of the hydrant, significantly simplifying the maintenance of this type of product.
